Vault Verify
Employment Verification

Eliminate time-consuming phone calls and drawn-out searches for past employee history verification requests. Vault Verify resolves complicated problems, providing information fast and efficiently.

- No more inbound employee verification phone calls.
- Add Vault Verify onto your phone's auto attendant and redirect all requests to Vault Verify.
- Meet all legal requirements of data storage on the Vault Verify secure, compliant, and fully redundant servers.

Redirect Option - Simple 20 minute setup and you're up and running.
You direct all incoming verification requests to Vault Verify. Vault Verify will gather the information and send you an email that a pending request is waiting in your secure partner portal. Completing the request with a few clicks has never been easier. This allows uninterrupted daily workflow within your HR department and reduces the liability, labor as well as human error associated with verbal communication.

Self-Maintenance Option - Simple 48 hour setup and you're up and running.
Send Vault Verify the list of all your current and past employees. Vault Verify will input the data into their system. Once all your information is securely in the Vault Verify system, the power of the flexible user friendly system is now in your hands, giving you control to make changes to your company's employee data with a few simple clicks.

Fully Automated Option
The Vault Verify customizable API establishes a seamless flow of the necessary employee data. Whether your database is maintained by payroll, accounting or the many types of HRIS systems, Vault Verify will customize an easy solution to ensure secure movement of the employee data.

We Pay You to Use Vault Verify
With the Vault Verify service, there are no setup fees, monthly fees or transactional fees to employers who utilize the outsourcing service. In fact, users of Vault Verify will earn $1.00 each time an organization verifies employment for a past employee through the system.
